The Dupps Company opens new manufacturing plant

GERMANTOWN, OHIO — The Dupps Company has announced the opening of a new 48,000 square foot manufacturing and inventory facility, located at its Germantown, Ohio headquarters. The plant features state-of-the-art five- and six-axis machining centers that dramatically increase production capacity, and assure rapid turnaround of Dupps manufactured equipment and replacement parts.

The new facility, which includes one of the largest CNC boring mills currently available, makes components for the Dupps Pressor® high-pressure screw press, Supercookor® continuous cooker, and other Dupps rendering and process machinery. In addition to increased production capacity, the new plant's high-accuracy machining centers will allow performance enhancing design improvements to key parts including screw press shafts, shaft flights and cage bars, close-tolerance cooker parts, and more.

According to company president Frank Dupps, the new manufacturing plant's increased production capacity and upgraded machining capability mean that Dupps customers can rely on the highest quality replacement parts, delivered as quickly as possible, to maximize productivity and minimize downtime. *“This new center of excellence will help us fulfill our promise of rapid-response service to every customer. With assured on-time delivery of vital parts, plus the functionality and reliability benefits that come from even tighter part machining tolerances, our customers can stay ahead of ever-growing productivity and quality demands.”*

For more information on the new Dupps manufacturing facility, please contact Ken Thomas at The Dupps Company, (937) 855-6555, KThomas@dupps.com, or visit www.dupps.com. **Visit Dupps at IPPE, Booth C-33159.**

The Dupps Company is a worldwide leader in protein recycling systems and service. From its founding, Dupps has focused on renewable resources, starting with the 'original recyclers' — those rendering companies around the world that recycle millions of tons of animal byproducts every year. Dupps offers a comprehensive range of protein co-products processing equipment, service and support for red meat, pork, poultry, and fishmeal applications.

Serving those who renew, recycle and sustain

We continue to grow our capabilities, expanding our products and services to include:

- Oil Seed Processing
- Insect Protein Processing
- Pulp & Paper Dewatering
- Special Process Applications

The Dupps Company's new 48,000 sq. ft. state-of-the-art manufacturing center.
