

Driving Innovation in Reproductive Efficiency for Livestock

VEMO Corp. Showcases VemoHerb® Tribens at IPPE 2025

Sofia, Bulgaria – January 13, 2025 – VEMO Corp., a leading manufacturer of phytogetic and enzyme-based feed additives, herbal extracts, dietary supplements, and food enzymes, is committed to transforming the livestock farming. During IPPE 2025 in Atlanta, VEMO will be showcasing VemoHerb® Tribens - an innovative product exemplifies VEMO's mission to provide sustainable, science-driven solutions that meet the evolving needs of the agricultural industry.

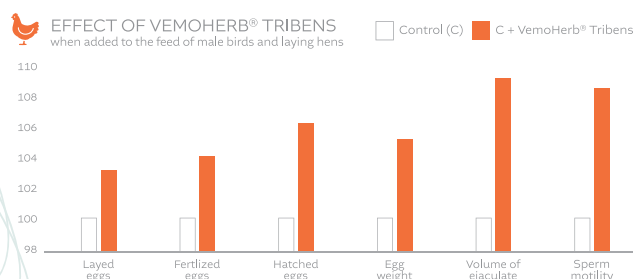

VemoHerb® Tribens is a meticulously formulated feed additive that combines natural phytogetic extracts in a scientifically validated solution, designed to boost productivity, improve reproductive efficiency, and enhance offspring quality across multiple animal species.

VEMOHERB® Tribens

PHYTOGENIC ADDITIVE
BOOSTING LIVESTOCK BREEDING

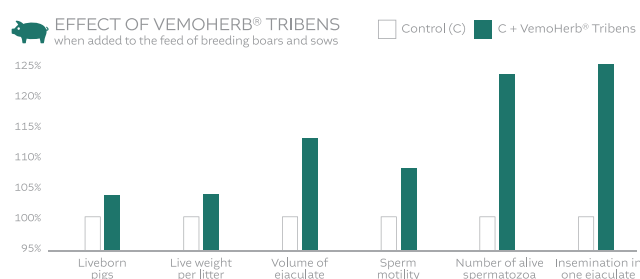

Proven Results Across Species

Field-tested and validated, VemoHerb® Tribens has demonstrated exceptional results:

POULTRY

- Increased rooster libido by up to 21%.
- Enhanced semen volume by 9.3% and sperm motility by 8.9%.
- Decreased unfertilized eggs, particularly in older birds.

BOARS

- Improved semen volume by 12.8% and sperm motility by 7.7%.
- Supported recovery from necrospemia.
- Increased litter size by 1.08 piglets per litter.

Economic and Operational Advantages

VemoHerb® Tribens is more than a performance booster - it is a cost-effective, sustainable solution. By optimizing reproductive outcomes, it helps reduce production costs and enhance profitability. The additive is simple to incorporate into feed or drinking water, seamlessly integrating into existing farming practices.

A Sustainable Future in Livestock Farming

With its natural phytogetic composition and proven efficacy, VemoHerb® Tribens embodies VEMO's commitment to sustainability and innovation. This advanced solution ensures healthier animals, superior offspring quality, and enhanced financial outcomes, addressing the needs of farmers and consumers alike.

Join VEMO at IPPE 2025 Atlanta, Booth A1003, to learn more about VemoHerb® Tribens and its transformative impact on livestock reproduction. Our experts are eager to discuss how this innovative product can help farmers achieve healthier animals, superior offspring quality, and enhanced economic outcomes.

The scientific expertise and closed-loop production process, allows VEMO to deliver high-quality products that drive significant economic value and sustainable market success.

Partner with VEMO Corp. for a future built on reliability and long-term success.
